

Special Session Call for Papers

Interactive Mobile Communication: Social Implications in Workplace and Education (IMCSIWE)

Overview

With the ubiquity and rapidly expanding functionality of mobile technologies, users can interactively communicate at their workplace and learning environment. More and more researchers, developers and practitioners are employing resources, methods and applications to facilitate communication, collaboration and sharing. Interactive mobile devices can also make work and learning more accessible, equitable, personalized and flexible in educational settings. This special session will address novel methods and applications useful to those exploring everyday interactive mobile communication in their workplace, social and educational contexts.

Topics

The session aims to attract research papers and case studies on novel methods and applications related to interactive mobile communication. We invite researchers, developers and practitioners from various fields, including but not limited to engineering, technology, computer science, communication, business, linguistics, ethnography, sociology and psychology, working on the following areas:

- Business Online Communities
